Indicative locations of the onshore elements of the Proposed Development

- Extent of existing National Grid Bolney substation partially visible through intervening vegetation, mainly in the winter
- Extent of onshore substation extension (GIS option) partially visible through intervening vegetation, mainly in the winter (12m maximum building and infrastructure height)
- Extent of onshore substation extension (AIS option) partially visible through intervening vegetation, mainly in the winter (12m maximum building and infrastructure height)

Note: The exact location of the building / infrastructure has not yet been confirmed within the site area, therefore this figure presents the maximum height of proposed building / infrastructure across the entire site area to provide an indication of the maximum design scenario.
